
Microcrystal
introduction instrument
Black technology promotes absorption, is painless,
non-invasive and does not damage the skin
With upgraded adjustable small crystal bottle consumables

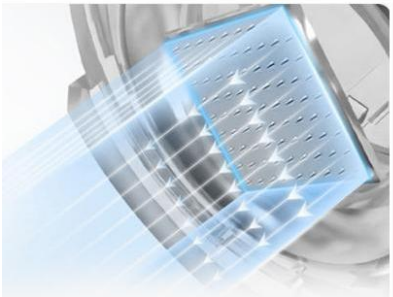

6 core advantages

1. Equipped with newly upgraded adjustable liquid discharge nano-microcrystalline consumables

All-round use, abandon the traditional inefficient application method

Adjustable liquid discharge

2. Three light types: blue, red and purple

3. High frequency introduction of ultra-quiet motor brush

Strong horsepower, average speed up to 5000 revolutions per minute

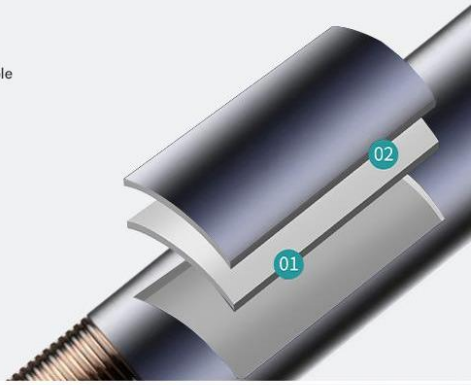

4. High-quality aviation aluminum

Good corrosion resistance, durable

Surface protective layer 2

Enhance surface hardness and beauty

5. Massage head vibrates at high speed

6. Visual gear adjustment

The gear position can be adjusted according to personal needs for better operation

High-frequency introduction is ultra-quiet
Painless and non-invasive, rapid penetration, avoiding the awkward recovery period
5000 average speed
3
kind of
light wave
99.99% silicon crystal

Penetrate the skin surface
to open the skin absorption channel
Microcrystalline bumps are small enough to promote efficient nutrient input
Microcrystalline protrusions are small enough to promote efficient nutrient input
Multiple nano-crystals are arranged to open the skin
channels without obvious pain
Nanochips
penetrate easily
stratum corneum
basal layer
Dermis

Three-color photons enable multi-dimensional
directional skin rejuvenation
Multiple energies and light sources simultaneously rejuvenate and nourish the skin
Blue light 440nm (sterilization)
Promotes repair, absorption and collagen reorganization,
making the skin firm and smooth
Red light 620nm (repair)
Balance oil secretion, improve skin problems
such as enlarged pores, acne, etc.
Purple light 380nm (sterilization and repair)
Combining the effects of red light and blue light, it improves
loose, rough and dull skin and regulates water and oil balance

ODM/OEM

Instrument + chip size customization

Source manufacturer·After-sales guarantee·Independent development·Exclusive private model

Wide selection of consumables

4D/5D microchips, large, medium and small outlet diameters, you can choose the appropriate consumables according to the characteristics of your product.

4D- small contact area, suitable for eye essence introduction

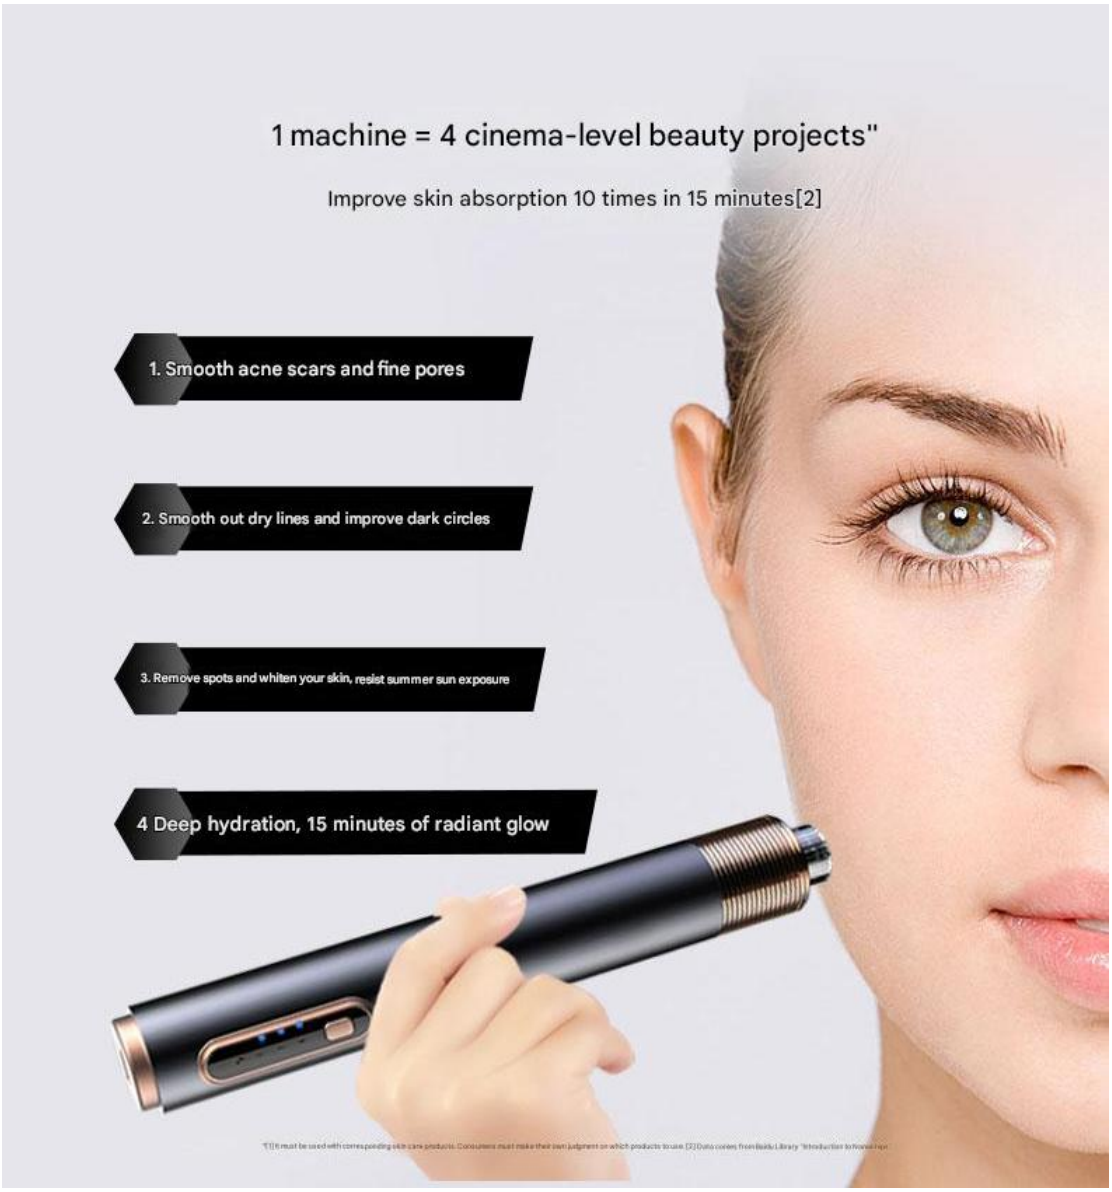

5D-Large contact area, suitable for facial essence introduction

Sodium

*Quantitative quantity 3ML, one tube is enough for one time use, single-disposable design, throw away after use, reduce secondary pollution

1 machine = 4 cinema-level beauty projects"
Improve skin absorption 10 times in 15 minutes[2]
1. Smooth acne scars and fine pores
2. Smooth out dry lines and improve dark circles
3. Remove spots and whiten your skin, resist summer sun exposure
4 Deep hydration, 15 minutes of radiant glow

Easy to operate

10 minutes to do water light at home

1

Take out the 3ML microcrystal bottle

2

Pour the product into the bottle

3

Put into microcrystalline bottle

4

Turn on the gear and adjust the gear

5

Import essence with one click

Things to note

1. Before using the instrument, you need to clean your face and hands

2. Please use the dot-lifting method for weak areas and sensitive skin such as the eye area and nose wings.

3. Do not press and lift the same part more than 3 times, and do not stay for more than 3 seconds each time.

4. It is recommended to use 1-2 times a week, and each operation takes 5-10 minutes

5. Due to special physical conditions during pregnancy and lactation, it is recommended to temporarily stop using

Parameters reflect the quality and

are so easy to use that you can't put it down

Product Name: Nano-crystal Introducing Device Type A

Product gear: 1-3 gear

Battery capacity: 500mA

Charging time: 2h

Working voltage: 5V 0.5A

Product size: 200*3.4*3mm

Packing list: Host x1 Packing box x1 Charging cable x1 Microcrystalline consumables x2

Product weight: 0.075kg (including base)
